FOR IMMEDIATE RELEASE

RED FLAG WARNING DECLARATION – CALDOR FIRE EVACUATIONS

Tahoe City, Calif. August 30, 2021 – The National Weather Service (NOAA) has issued a Red Flag Warning for critical fire weather conditions from 2:00 p.m. on Monday, August 30, 2021, and has expanded the expiration until 11:00 p.m. Wednesday, September 1, 2021 for the greater Lake Tahoe/Truckee area. The Fire Chief of the North Tahoe Fire Protection District, in accordance with the California Fire Code with amendments adopted by the Boards of Directors of the North Tahoe Fire, Meeks Bay Fire and Alpine Springs CWD, has issued a Declaration **prohibiting all sources of outdoor open flame** within these Districts during the time the Red Flag Warning is in effect (CF Code 307.1.1).

North Tahoe Fire Protection District (NTFPD) and Meeks Bay Fire Protection District (MBFPD) issue a Declaration to suspend all sources of outdoor open flame, including gas and LPG fire pits/grills and pellet grills/smokers. *The combination of dry fuels, gusty winds of 35-45mph, and low humidity can cause fires to rapidly grow in size and intensity before first responders can contain them.* The actual hours of Red Flag Warnings may vary by the specific atmospheric conditions; check the [NOAA website](#) or follow the National Weather Service in Reno for the latest Red Flag timing in the Tahoe/Truckee Region (CA Zone 272).

The [El Dorado County portion of the Tahoe Basin](#) is currently under mandatory evacuation due to the Caldor Fire, including the communities within the Meeks Bay Fire District to the Placer County line in Tahoma. Placer County has no evacuation warnings at this time. Now is the time to make sure your contact information is current with [Placer Alert](#). Ensure your vehicle has a full tank of fuel and is parked facing out, your devices are charged, your emergency go kit is current and within reach or already loaded, and that your family and pets are prepared, practiced and ready to evacuate. People wanting to evacuate without transportation should contact www.tahoetransportation.org for assistance. Follow www.linktr.ee/IMT6 for official Caldor Fire Incident updates.

Visit our website for information on [Emergency and Evacuation Preparedness](#). For additional information on how to make your home more resilient to wildfire, visit www.tahoelivingwithfire.com

The National Weather Service (NWS) in Reno issues Red Flag Warnings to alert Tahoe Basin land management agencies about the onset, or possible onset of critical weather and fuel moisture conditions that could lead to rapid or dramatic increases in wildfire activity. This could be due to low relative humidity, strong winds, dry
